OPREA COSMIN ALEXANDRU

• full-stack web developer •

ABOUT ME

Are you seeking a skilled and attentive full-stack developer who can effectively translate your ideas into code? I'm genuinely passionate about programming and thrive on challenging tasks. My freelance experience has allowed me to develop a strong problem-solving mindset. Now, I'm eager to transition into a professional environment where I can learn from experienced mentors and grow beyond what self-learning platforms offer.

EDUCATION

Mathematics and Computer Sciences Faculty in German language
BACHELOR IN INFORMATICS at UBB Cluj

EXPERIENCE

WordPress developer intern

MySkin SRL | August 2024–January 2025

- Managed three websites, ensuring their functionality, performance, and accessibility are consistently optimized.
- Create, modify, and update website pages as needed, keeping content fresh and engaging.
- Troubleshoot site issues, including layout inconsistencies, plugin conflicts, and security vulnerabilities, to maintain seamless user experiences.
- Conduct regular updates to WordPress themes and plugins, ensuring compatibility and enhancing site performance.

Software Engineer Intern

Raiffeisen Bank, Think Tank Lab - Internship Programme | December 2023–March 2024

- Used **React Native** and **Django** for developing a mobile application for personal finance management to help students manage their money.
- Collaborated with 2 interns and a mentor to brainstorm and implement ideas into app's development

MY FREELANCE JOURNEY

Infraredslim - Presentation website

2024

- Developed a responsive WordPress website for infrared slimming and toning equipment using custom **HTML**, **CSS**, and **PHP** to ensure a tailored user experience. Enhanced design with **CSS** animations to highlight product features dynamically, creating an engaging layout.
- Integrated custom booking forms, **optimized SEO** with schema markup, and implemented caching solutions to improve loading times. Ensured cross-browser compatibility and mobile responsiveness for a seamless experience on any device.

MrRibs Restaurant - Presentation website

2023

- Created and launched a dynamic website for MrRibs restaurant, enhancing their online presence and customer engagement. It includes an administration panel for database management.
- Structure: Front-end -> **React.js**; Database management tool-> Sanity Studio;

Rebalanacyu Shop - E-commerce platform

2023

- Developed an e-commerce **website** that offers an efficient customer journey and a convenient back-office platform for business management.
- Structure: Front-end -> **React.js**; Back-end -> **Python Django;** Database management tool-> **SQLite**, **Sanity Studio;**
